DETAILED ACTION

 Applicant's response to the Office Action mailed March 22, 2004 is acknowledged. Currently, claims 1-15 and 20-34 are pending. Claims 20-34 are newly Claims 1, 4, 5-7 and 13, are currently amended. Claims 16-19 are cancelled.

Election/Restrictions

2. Newly submitted claims 20-34 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Although independent claim 1 and 20 are broadly drawn to an assay method for detecting endogenic cis-hydroxyproline and endogenic derivatives, claims 20-34 further requires quantitative analysis in order to determine development or progression of a disease or the effect of a treatment for the progression of disease. Therefore, both methods are patentably distinct one from the other.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 20-34 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Application/Control Number: 09/926,444

Art Unit: 1641

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Page 3

4. Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification recites the detection of one derivative, N-methyl-cis-hydroxyproline (specification, page 3), but does not provide written description for the detection of any and all derivatives for endogenic cis-hydroxyproline. "An adequate written description requires a precise definition, such as by structure, formula, chemical name, or physical properties, not a mere wish or plan for obtaining the claimed chemical derivative". There is insufficient description in the disclosure to support the generic claims as provided by the Interim Written Description Guideline published in the June 15, 1998 Federal Register at Volume 63, Number 114, pages 32639-32645. Applicant is invited to show support to obviate this rejection.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 09/926,444 Page 4

Art Unit: 1641

6. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. The preamble of claim 1 is indefinite. The body of the claims is directed to detection of endogenic cis-hydroxyproline and endogenic derivatives. The preamble of the claims should reflect such detection as set forth in the body of the claim. The body of the claim is also incomplete becaue a single detection step does not comprise a complete assay. Any assay requires a step of contacting reagents, with a sample, a detection step, and a correlation step. Claim 1 is also indefinite as to what constitutes "endogenic derivatives thereof".

Response to Arguments

8. Applicant's argument that the reference of Popow et al only teaches detection of isomers of cis-hydroxyproline that have been exogenously by the authors either by feeding the animals the compounds of interest or through addition of the compounds of interest to the analytical samples as an internal standard. Applicant further argues that the claims has been amended to include detection of "endogenic" cis-hydroxyproline to obviate the rejection. Applicant's arguments have been fully considered and are persuasive. Therefore, the reference of Popow et al has been withdrawn.

Application/Control Number: 09/926,444 Page 5

Art Unit: 1641

9. Applicant's argument that the reference of Sessa et al didn't measure cishydroxyproline but measured trans-hydroxyproline instead is found persuasive.

Therefore the rejection of Sessa et al is hereby withdrawn.

Conclusion

10. No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah A Davis whose telephone number is (571) 272-0818. The examiner can normally be reached on 8-5 Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le can be reached on (571) 272-0823. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
